

Water Sewer Board Meeting 8/20/2019

Attendance: Ron Mills, Elgon Ellis, Nick Garlinghouse, Dan Jere

Rich Phillips

- Tank painting and repairs are schedule to begin towards the end of the week Thursday 22nd or Friday 23rd. The porta tank (temporary pressurized tank to store water) has been delivered and set up and when water quality test are approved by DEQ the porta tank will be put online and used while the tank is being painted and repaired. Estimated 15 days of work to make repairs and paint the tank.
- Lead and Copper analysis for all home lead surveys still needs to be completed.
- Well head testing is on going.
- Lagoons are in good condition, 2 of the lagoons are cooking and working to break down.
- Water Shut offs for seasonal residents.
- Steven Hyde will be having water and sewer hooked up at his new resident on Crawford St within the next few months.
- Chris and Jeff Smith are currently installing a well on River St.
- Discussion of possibly getting some sewer cleaning and televising and utilizing the camera system. Rich feels with the work load that he and Lyle will be able to begin televising some of the system this fall. Asked again if needing temporary help would be any benefit to get the entire system televised.
- Lots of other township work being completed, Rich and Lyle will be attempting to cut some of the steel at the boat launch underwater.
